FEMLINK: One woman artist/one video/one country, the international video collage brings together feminist voices from upwards of 40 countries from around the globe. Co-curated by French video artist, Véronique Sapin and American intermedia artist, C. M. Judge, the project is organized around a simple principle: one video artist per country, creating a one to two minute video around a common theme: RESISTANCE. FemLink gathers "the power of culture and art to serve human values, create dialogue and promote peace and acknowledgement of others hoping to contribute positively in a just way to our diverse world."
